

ConSlitter CFRU - CFRO BlueLine

Technical Data

Materials

Films, refined papers, laminates

Material thickness

10 - 500 μm

Material widths

1,050 · 1,450 · 1,750 2,050 · 2,250 mm

Parent roll diameters

1,000 · 1.300 mm

Finished roll diameters

max. 850 mm (1,000 mm)

Finished roll weights

max. 600 kg (feature-dependent)

Slitting systems

Blade cut · scissor cut

Slitting widths

≥ 25 mm

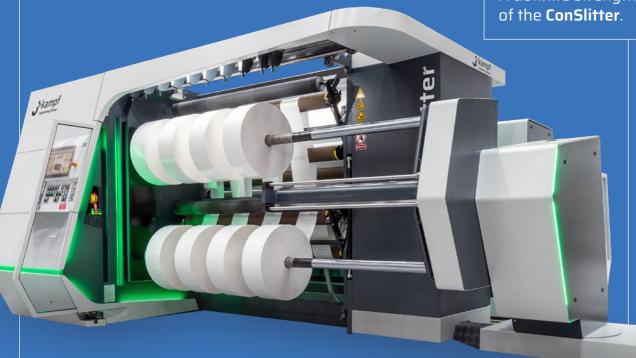

Winding cores

70 mm · 3" · 6"

Machine speed

max. 800 m/min

Efficiency.
A definite strength
of the **ConSlitter**

Wide range of equipment options. Everything is possible.

Large process window for your production requirements. Modular design from unwinding to rewinding:

- Variable roll dimensions
- Variable web path: underfloor or overhead
- Flexible slitting modules
- Finished roll handling

KAMPF quality and reliability:

- Repeatable roll quality: every day, year after year
- Highest reliability through consistently good quality.

Operating convenience redefined:

- New user interface with 2-touch navigation
- Integrated safety features

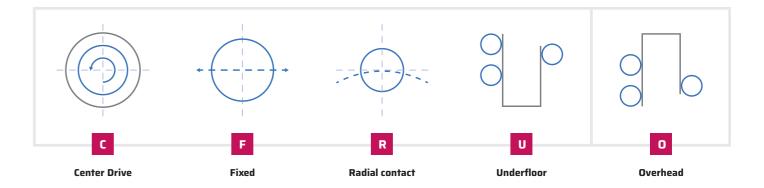

Flexibility and stability.

You are producing a variety of different materials and therefore require a winder that not only processes them safely and precisely, but also at high web speeds? Would you like to choose from a wide range of modules -

from completely manual to semi-automated - to configure the right machine for your production?

Our new ConSlitter CFRU or CFRO BlueLine is the machine with the highest degree of flexibility with five different working widths, different parent roll diameters and slitting systems as well as extended options.

- Reduce set-up times
- Automate roll logistics
- Realize data transfer

Improved awareness brings more security into your everyday life. An intelligent lighting concept communicates the current status of the machine. By changing the color of the illumination according to the situation, you

can monitor this in the direct surrounding the machines as well as from a distance. With the other newly designed and fully integrated safety devices, you always have an overview, even from a safe distance.

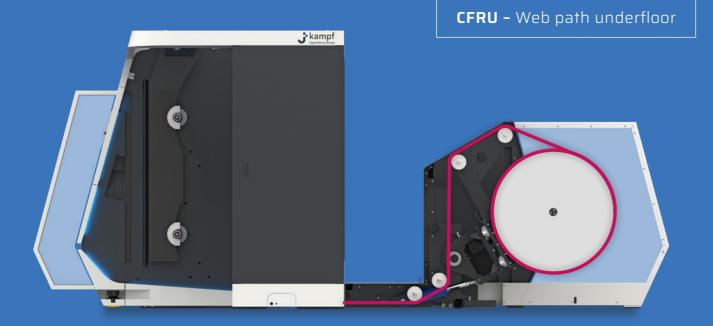

Safety rethought. Occupational safety with perspective.

Look and Feel.

OPERATING COMFORT IN A NEW DESIGN.

Simplified machine operation, optimum accessibility and integrated safety are combined by a completely new shape and color concept.

The intuitive KAMPF-2-touch operation is also part of the eye-catching industrial design, same as the newly designed work areas or the trend-setting handling and digitization solutions. Behind the new shape of the ConSlitter is the latest Siemens control system combined with precise drive and control technology along with the KAMPF proven mechanical engineering.

A modular system.

OPTIONS SUITABLE FOR YOUR APPLICATION

Splicing table for unwinder with Ø 1,000 mmHigh quality splices – made easy. Integrated, fixed splicing table.

Splicing table for unwinder with Ø 1,300 mm Swiveling splicing table for reliable splices – easy, safe and comfortable operation.

Positioning aidTime saving and precise alignment for shear bottom knives and grooved bushes.

Automatic knife positioningFor repeatable exact slitting positions and set-up time reduction for shear cut.

Razor blade cut
Reasonable and good. Optionally
as groove or mirror cut.

Expansion and friction winding shaftsSafe production for simple applications and reproducible quality for demanding materials.

DIGITAL CUSTOMER SOLUTIONS

The digital **customer portal my@vanced** and the **integrative platform the@vanced** make change accessible: with digital collaboration, intelligent production, and continuous evolution of know-how.

my@vanced is our digital customer portal: Up-to-date information, practical knowledge, easy spares identification, online shop, and the certainty to have all necessary information in one place – at any time.

the@vanced is our digital integrative platform. It connects value chain systems in the field of webshaped materials processing. With the <u>five packages</u> Essential, Assistance, Availability, Productivity and Connectivity it allows scalable solutions from using our Remote Service to a full integration into existing MES or ERP systems.
